The tablet is easier to install with two people, but Not Required. If there are two people, please position one person in the front passenger seat, and one person in the back passenger seat.

-
- 1** Remove the tablet, mounting bracket, Alfi provided charger & plastic cable ties from the box.
-
- 2** Hold the tablet with mounting bracket barcode facing towards you.
-
- 3** Pass the first cable tie through hole **A** on the left lower part of the mounting bracket, such that the cable tie head (locking end) is facing outward.
-
- 4** Continue passing the cable tie from the front to the back of the mounting bracket, through hole **C**, until both ends are equal in length.
-
- 5** Pass the second cable tie through hole **F** located on the right lower part of the mounting bracket, such that the cable tie head (locking end) is facing outward.
-
- 6** Continue passing the cable tie from the front to the back of the mounting bracket, through hole **D**, until both ends are equal in length.
-
- 7** Raise the passenger headrest until you have enough clearance to easily thread the cable ties through the gap between the headrest and the seat.
-
- 8** Place the Alfi tablet assembly on the back of the passenger headrest making sure that each of the cable Ties go around each of the headrest Posts.
-
- 9** Insert the tail of each cable tie into the cable tie head (locking end) and pull snug, leaving room for adjustment.
-
- 10** Once both cable ties are installed, tighten each side equally. Make certain that the tablet mount is secure without excess slack in the cable tie.
-
- 11** Cut the excess cable tie flush, making sure to leave no sharp edges behind. If you accidentally leave a sharp edge, you can use scissors to make it safe and flush.
-
- 12** Plug the cable into the provided charger. The Alfi tablet will turn on once it connects to your vehicle's power source. If it does not, press and hold the power button until the tablet powers on.
